Joinery
Catalogue

George Hudson & Son Ltd.

Blackwattle Bay, Glebe,
Regent Street, Redfern,
Sydney, N.S.W.

BLACKWATTLE BAY,
GLEBE,

December, 1910.

I N presenting the Second Edition of our Illustrated Catalogue, we respectfully thank those who have so generously accorded us their valued orders in the past, and assure them that we will continue to still give the best of our attention as hitherto.

In submitting these new designs we wish to direct attention to the fact that we can supply the very best in the way of

Timber, Joinery, & General Builders' Supplies.

and we hope to further extend our already large circle of customers, according that same careful consideration which has been the means of securing and retaining confidence.

Our stocks comprise **several million feet** of timber of all descriptions, and mouldings, doors, sashes and every class of joinery and turnery, glass, galvanised iron and all supplies requisite to the building trade. The large stocks held by us are the best proof we can execute orders promptly.

We have lately equipped our Mill with **the very latest machinery**, which enables us to turn out work of superior finish. **Our Electric Band Saws** are the best of their kind, and we are therefore placed in a position to supply you with **the best of work at the lowest price.**

We have erected **the largest Electric Travelling Cranes in the Southern Hemisphere**, which greatly facilitate the handling of timber, thereby reducing the cost of labour to a minimum, and expediting the despatch of goods.

To cope with the great increase in our joinery orders, we have had to greatly enlarge our Factory. We have also installed some of the most modern machinery particularly adapted to this class of work, which will enable us to quote prices which will not fail to draw orders. This is the result of our desire to give only the best of material and workmanship, and that we are giving satisfaction is proved by the ever-increasing demand for our joinery.

We are pleased to quote for all classes of joinery, mouldings, etc., on receipt of particulars.

When ordering, in accordance with designs embodied in this catalogue, please give us the number of illustration, together with all particulars and we cannot fail to afford you every satisfaction; or if there is nothing shown which exactly suits your requirements send us a sketch of what you want, for a sketch, however rough, will give us a better idea than any amount of writing.

We issue price lists of timber, joinery, etc., every month. Call or write for one, and if in the Building Trade advise us and we will put your name on our Mail List for a monthly copy.

Yours respectfully.

Geo. Hudson & Son, Ltd.

442

443

444

445

446

Seat No. 445 is very much in demand for Picture Shows, &c., being cheap, strong, and of good appearance.

Portable Homes.

A VERY active business is carried on by us in this line in order to meet the demands of the community.

THESE HOMES ARE SPECIALLY ADAPTED FOR

Rising Mining and Agricultural Townships or Summer Residences

owing to the ease and despatch with which they can be erected.

The Timber is all cut to length, and each beam is marked ready for erection, so that the builder can tell exactly where each piece is intended for.

THE ADVANTAGES attached to this class of Building are:—

- 1.—The rapidity with which it can be erected.
- 2.—A person whose knowledge of Carpentering is only slight, should be able to put them together.
- 3.—It considerably lessens the cost, as only the exact quantity of Timber is forwarded, thus reducing the amount of freight payable, and the loss through over-estimating the quantity of Timber required.

We are also prepared to quote your Own Designs.

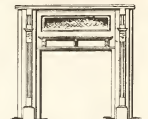

Our Catalogue containing a wide range of **Cottage and Bungalow Designs** will be forwarded you, on receipt of your request.

GEORGE HUDSON & SON^{LD}

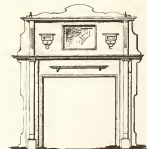

MANTELS.
